

Request that the FCC not implement any proposal that will lessen Indiana's Telephone Privacy Law. This law has prevented many interruptions of quiet family suppers; seems the salespeople and solicitors like to call then. Prior to our Law, we would receive several calls each night at supper time and then again an hour or so afterwards. It was a big pain to get up from the table with a mouth-full of food only to find out that some company was trying to sell you something you didn't need or want. Our meals and evenings are so much more peaceful now, thanks to the Indiana Telephone Privacy Law. Now all the calls we get are from the State Police re some project of its. My wife and I believe that this Law is a blessing and request that the FCC do nothing to weaken it! Non-inteference of our private time by bothersome salespersons and solicitors in very important to us. We will greatly appreciate your consideration of andkind compliance with this comment/request. Thank you.
